Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Base_Operation	??
Server_Operation	??
Subscriber_Operation	??
Timer_Operation	??
Client	??
Component	??
Operation_Queue	??
Operation_Queue::PriorityOrdering	??
Publisher	??
Server	??
Subscriber	??
Timer	??
XML_Parser	??

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Base_Operation	??
Client	??
Component	??
Operation_Queue	??
Operation_Queue::PriorityOrdering	??
Publisher	??
Server	??
Server_Operation	??
Subscriber	??
Subscriber_Operation	??
Timer	
Timer class	??
Timer_Operation	??
XML_Parser	??

Chapter 3

File Index

3.1 File List

Here is a list of all documented files with brief descriptions:

/home/pranav/Repositories/zmq-comm/include/ client.hpp	??
/home/pranav/Repositories/zmq-comm/include/ component.hpp	??
/home/pranav/Repositories/zmq-comm/include/ operation_queue.hpp	??
/home/pranav/Repositories/zmq-comm/include/ operation_types.hpp	??
/home/pranav/Repositories/zmq-comm/include/ publisher.hpp	??
/home/pranav/Repositories/zmq-comm/include/ server.hpp	??
/home/pranav/Repositories/zmq-comm/include/ subscriber.hpp	??
/home/pranav/Repositories/zmq-comm/include/ timer.hpp	
This file declares the Timer class	??
/home/pranav/Repositories/zmq-comm/include/ xml_parser.hpp	??
/home/pranav/Repositories/zmq-comm/src/ timer.cpp	
This file contains definitions for the Timer class	??

Chapter 4

Class Documentation

4.1 Base_Operation Class Reference

Inheritance diagram for Base_Operation:

Public Member Functions

- **Base_Operation** (std::string name, unsigned int priority)
- std::string **get_name** ()
- unsigned int **get_priority** () const
- virtual void **execute** ()

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/operation_types.hpp

4.2 Client Class Reference

Public Member Functions

- **Client** (std::string name)
- **Client** (std::string name, std::vector< std::string > endpoints)
- void **connect** (std::vector< std::string > new_endpoints)
- std::string **get_name** ()
- std::string **call** (std::string message)

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/client.hpp

4.3 Component Class Reference

Public Member Functions

- `std::thread * spawn ()`

Protected Attributes

- `Operation_Queue * operation_queue`
- `std::thread * executor_thread`

The documentation for this class was generated from the following file:

- `/home/pranav/Repositories/zmq-comm/include/component.hpp`

4.4 Operation_Queue Class Reference

Classes

- struct [PriorityOrdering](#)

Public Member Functions

- void **enqueue** ([Base_Operation](#) *new_operation)
- void **dequeue** ()
- bool **empty** ()
- [Base_Operation](#) * **top** ()
- void **process** ()
- `std::thread * spawn ()`

The documentation for this class was generated from the following file:

- `/home/pranav/Repositories/zmq-comm/include/operation_queue.hpp`

4.5 Operation_Queue::PriorityOrdering Struct Reference

Public Member Functions

- bool **operator()** (const [Base_Operation](#) *lhs, const [Base_Operation](#) *rhs) const

The documentation for this struct was generated from the following file:

- `/home/pranav/Repositories/zmq-comm/include/operation_queue.hpp`

4.6 Publisher Class Reference

Public Member Functions

- **Publisher** (std::string name)
- **Publisher** (std::string name, std::vector< std::string > endpoints)
- void **bind** (std::vector< std::string > new_endpoints)
- std::string **get_name** ()
- void **add_connection** (std::string new_connection)
- void **send** (std::string message)

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/publisher.hpp

4.7 Server Class Reference

Public Member Functions

- **Server** (std::string name, unsigned int priority, std::function< std::string(const std::string &)> operation_↵function, [Operation_Queue](#) *operation_queue_ptr)
- **Server** (std::string name, unsigned int priority, std::vector< std::string > endpoints, std::function< std↵::string(const std::string &)> operation_function, [Operation_Queue](#) *operation_queue_ptr)
- void **bind** (std::vector< std::string > new_endpoints)
- std::string **get_name** ()
- unsigned int **get_priority** ()
- void **add_connection** (std::string new_connection)
- void **recv** ()
- void **rebind_operation_function** (std::function< std::string(const std::string &)> new_operation_function)
- std::thread **spawn** ()
- void **start** ()

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/server.hpp

4.8 Server_Operation Class Reference

Inheritance diagram for Server_Operation:

Public Member Functions

- **Server_Operation** (std::string name, unsigned int priority, std::function< std::string()> operation_function, zmq::socket_t *socket_ptr, bool *recv_ready)
- void **execute** ()
- zmq::socket_t * **get_socket_ptr** ()
- void **set_ready** ()
- std::string **get_name** ()
- unsigned int **get_priority** () const

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/operation_types.hpp

4.9 Subscriber Class Reference

Public Member Functions

- **Subscriber** (std::string name, unsigned int priority, std::string filter, std::function< void(const std::string &)> operation_function, [Operation_Queue](#) *operation_queue_ptr)
- **Subscriber** (std::string name, unsigned int priority, std::string filter, std::vector< std::string > endpoints, std::function< void(const std::string &)> operation_function, [Operation_Queue](#) *operation_queue_ptr)
- void **connect** (std::vector< std::string > new_endpoints)
- std::string **get_name** ()
- unsigned int **get_priority** ()
- void **add_connection** (std::string new_connection)
- void **recv** ()
- void **rebind_operation_function** (std::function< void(const std::string &)> new_operation_function)
- std::thread **spawn** ()
- void **start** ()

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/subscriber.hpp

4.10 Subscriber_Operation Class Reference

Inheritance diagram for Subscriber_Operation:

Public Member Functions

- **Subscriber_Operation** (std::string name, unsigned int priority, std::function< void()> operation_function)
- void **execute** ()
- std::string **get_name** ()
- unsigned int **get_priority** () const

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/operation_types.hpp

4.11 Timer Class Reference

[Timer](#) class.

```
#include <timer.hpp>
```

Public Member Functions

- **Timer** (std::string name, unsigned int priority, long long period, std::function< void()> operation_function, [Operation_Queue](#) *operation_queue_ptr)
- void **operation** ()
- std::string **get_name** ()
- unsigned int **get_priority** ()
- void **change_period** (long long new_period)
- void **rebind_operation_function** (std::function< void()> new_operation_function)
- std::thread **spawn** ()
- void **start** ()

4.11.1 Detailed Description

[Timer](#) class.

The documentation for this class was generated from the following files:

- /home/pranav/Repositories/zmq-comm/include/[timer.hpp](#)
- /home/pranav/Repositories/zmq-comm/src/[timer.cpp](#)

4.12 Timer_Operation Class Reference

Inheritance diagram for Timer_Operation:

Public Member Functions

- **Timer_Operation** (std::string name, unsigned int priority, std::function< void()> operation_function)
- void **execute** ()
- std::string **get_name** ()
- unsigned int **get_priority** () const

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/operation_types.hpp

4.13 XML_Parser Class Reference

Public Member Functions

- **XML_Parser** (const char *filename)
- void **parse** ()

The documentation for this class was generated from the following file:

- /home/pranav/Repositories/zmq-comm/include/xml_parser.hpp

Chapter 5

File Documentation

5.1 /home/pranav/Repositories/zmq-comm/include/timer.hpp File Reference

This file declares the [Timer](#) class.

```
#include <iostream>
#include <string>
#include <chrono>
#include <ratio>
#include <thread>
#include "operation_queue.hpp"
```

Classes

- class [Timer](#)
[Timer](#) class.

5.1.1 Detailed Description

This file declares the [Timer](#) class.

Author

Pranav Srinivas Kumar

Date

2016.04.24

5.2 /home/pranav/Repositories/zmq-comm/src/timer.cpp File Reference

This file contains definitions for the [Timer](#) class.

```
#include "timer.hpp"
```

5.2.1 Detailed Description

This file contains definitions for the [Timer](#) class.

Author

Pranav Srinivas Kumar

Date

2016.04.24
